EXPERIENCE

KOTOZNA
Product Manager
Full-time

Minato-ku, Tokyo
2025-Present

- Owned end-to-end development of a conversational AI hotel-booking platform and hybrid RAG engine, from discovery and user research to launch, resulting in a 20% increase in customer satisfaction and a 25% reduction in booking friction.
- Defined and executed the product roadmap in collaboration with design and engineering, introducing backlog prioritization frameworks that improved sprint efficiency by 30%.
- Built integrated analytics and feedback systems to continuously measure NPS, retention, and task-success metrics—translating insights into iterative product improvements and faster decision cycles.
- Partnered with marketing and customer success to design data-driven onboarding and self-serve flows, improving activation rates and reducing support requests.
- Championed AI ethics and model-performance reviews, introducing lightweight evaluation criteria for accuracy, latency, and hallucination rates.
- Delivered multilingual platform enhancements (AI translation, auto-thumbnailing, semantic tagging) to expand global reach and reduce manual publishing work by 70%.

Data Analyst Internship

March 2024-April 2025

- Designed and maintained 20+ real-time client dashboards for airports, tourism boards, and hospitality groups—enabling partners to monitor performance, optimize content, and track ROI.
- Collaborated with PMs and engineers to refine prompt design and system prompts for multilingual LLM chatbots, improving response accuracy and contextual recall by 30%.
- Conducted market and user behavior analyses that shaped AI feature prioritization and pricing strategy.
- Supported product instrumentation using SQL, Python, and Looker Studio to define success metrics and automate KPI tracking across teams.

UCD DESIGN AND CONSTRUCTION MANAGEMENT

Davis, CA

Data Analyst
Part-time

January 2024-August 2024

- Led data migration and quality-assurance process for enterprise construction software, ensuring 100% data integrity and minimal downtime.
- Developed validation frameworks and QA documentation, creating repeatable processes for cross-department use.
- Automated data mapping and verification workflows with Excel, SQL, and Python, reducing processing time by 25%.
